

REMARKS

The present amendment is submitted in order to claim the amount of boron disclosed in the application in Table 1, in addition to the amount of boron as originally disclosed in the specification.

It is respectfully submitted that the amount of Boron in claims 2 and 10, namely, 0.0013 to 0.0053 weight percent, is not new matter. While Table 1 discloses amounts of Boron ranging from 0.0013 to 0.0030 weight %, the specification as filed also discloses the amount of Boron in the composition as satisfying an inequality that was originally written as

$$5 \text{ ppm} \leq \text{B-11/14} \times \text{N} \leq 30 \text{ ppm}$$

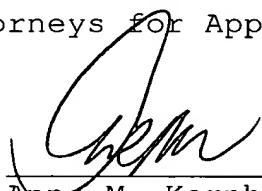

This ratio was disclosed in the specification as filed at page 3, first full paragraph.

In view of the above, it is respectfully submitted that the claims are now in condition for allowance, and favorable action thereon is earnestly solicited.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.  
Attorneys for Applicant
